

## Rapid Archive Access

Dealership-wide Solutions

U.S. and Canada

Easily access your archived reports and other information from a secure CD or Web site instead of wasting time searching for hard-to-find files.

### Ease and Security

Eliminate the need to store and manually retrieve reams of journals, schedules, general ledgers, and reports that are critical to your daily business decisions with Kodata, a solution that has been helping over 1,500 North American dealers since 1997. Report data is safely stored in an off-site vault in case of dealership disaster like fire, hurricane, tornado, or flood. In the U.S., Kodata helps dealers stay compliant with IRS Revenue Procedure 98-25. Unexpected audits of non-compliant dealers can result in fines up to \$11,000 per occurrence. Kodata ends the headache of disorganized reports, the worry of losing important files, and the fear of fines.

### Search and Recover

Save valuable time, money, and employee hours with this fully searchable, inexpensive alternative to month-end report printouts. Retrieve information from a CD or from any location through an Internet browser with a secure login and password. Year-end CDs can be provided to outside auditors, eliminating hours of report reproduction. With Kodata, your dealership information is safe and conveniently available.

*“Sonic Automotive has used Kodata Solutions for several years. We have found the product to be extremely beneficial and the service exceptional. They have a unique customer service attitude and this has been manifested in their ability to provide solutions to reporting needs that we were unable to obtain elsewhere.”*

### Reporting Versatility

Kodata's storage solutions work with any dealership management system your dealership uses. Manage a variety of reports, including optional customer reports such as inventory reconciliation, departmental profitability, expense analysis, and others. Business data is available in an ASCII format for audit and compliance purposes, and financial information is stored in an unalterable, nonproprietary format that cannot be deleted.

Fully searchable and cost-effective, Kodata is the alternative to paper printouts and can help you put a stop to inefficiencies and added costs across your dealership that come with an ever-increasing avalanche of paper. Kodata can save you time and money while helping keep you compliant.

*"Kodata makes it easy to transmit data and provides alternative storage options to printing and storing month-end books. We expect to save a great deal in storage and paper costs because we will no longer have to print our month-end books. This Web-based product provides ease of transferring and retrieval of data in a secure environment. As a Web-based product we can have unlimited users. Kodata is a very cost-effective alternative to printing and storing books, journals, schedules, and other important reports. This is a very cost-effective solution."*
