

Filing Made Simple

Dealership-wide Solutions

U.S. and Canada

ColorFile® Labels on Demand
for the ColorFile Filing System

Make the filing process easier and more efficient using single-strip labels you can print right in your dealership.

File in a Flash

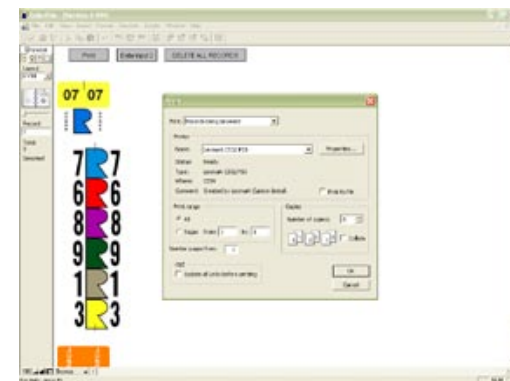

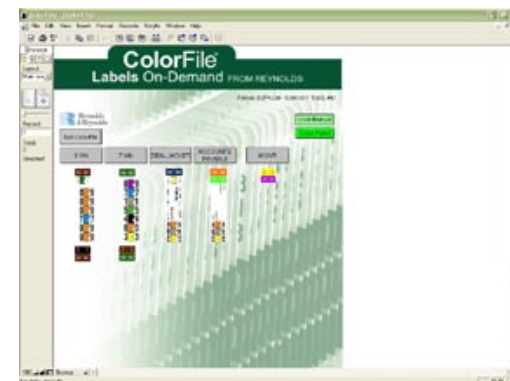

Create a fully color-coded file with a single-strip label using the unique and simple ColorFile® Labels On-Demand software program. With a single-strip label, you can save up to 60 percent of the time it traditionally takes to create a new file compared to applying multiple individual labels.

Files created using labels generated from the ColorFile Labels On-Demand system integrate seamlessly into existing ColorFile filing systems or can be tailored to match your current color-coded filing system needs. Whether alpha, numeric, year, month, make, or text, the ColorFile Labels On-Demand system has the technology to quickly take your information and print out complete and easy-to-read, color-coded labels for your files.

Simple to Create

Save time and money, every time you create a new folder! Everyone in your dealership will benefit by having easy-to-read, easy-to-sort, and easy-to-retrieve files. The ColorFile Labels On-Demand software package includes five templates to help you create labels that fit seamlessly with your color-coded systems. Create files faster in three easy steps:

- Choose a template to create your label.
- Type in the information to be coded.
- Preview and print.

ColorFile® Labels on Demand for the ColorFile Filing System

Files at Your Fingertips

Make new file folders quickly and easily with:

- Labels – Constructed of bright white printer compatible label stock and designed specifically for easy application to your filing folders, ColorFile labels work seamlessly with your existing color-coded filing system. Choose from a simple strip label for deals or accounts payable, our patented service label in either 6 or 7-digit VIN design, or our month/year labels to keep your records up to date.
- Laminates – For added protection from water, oils, grease, and UV rays that could shorten the life of your color-coded files, ColorFile laminate protectors help prevent harmful damage and save you time and money from having to re-label worn folders.
- Printers – Printing your new ColorFile Labels On-Demand labels couldn't be easier. Whether it is a network laser or versatile all-in-one ink-jet, we have the printers and supplies to fit your business needs.

PC Requirements

- CD-ROM drive and hard disk drive
- 100MB hard drive free space
- Pentium 300MHz or higher
- 128MB RAM for Windows XP
- Windows XP (Service Pack 1 or higher)
- Standard VGA color monitor
- Access to color printer (Inkjet or Laser)

From deal and accounts payable jackets in the front office to service folders in fixed operations, we've got it covered with the labels you need. Custom templates are also available for unique applications you may require.
