

## Stack Up for More Floor Space

Dealership-wide Solutions

U.S. and Canada

**Stackable Shelving Cabinetry**  
for the ColorFile® Filing System

Organize and streamline your filing process with Reynolds' Stackable Shelving Cabinetry, a modular filing solution for the ColorFile Filing System.

### A Better Filing System

Economically retain and protect your files with easy accessibility – even in limited spaces – with Stackable Shelving Cabinetry. Open shelves provide clearly visible and easily retrievable folders by utilizing vertical space to maximize file storage per square foot. One seven-shelf Stackable Shelving cabinet can hold the equivalent of two conventional, four-drawer file cabinets while using only about one half the floor space. This translates into over 200 percent more folders per square foot of floor space.

### Open, Durable Cabinets

Stackable Shelving cabinets are durable and provide superior filing capacity per square foot. Their simple, long-lasting design gives your dealership a more professional appearance.

Stackable Shelving cabinets are:

- Modular for stacking up to 87 ½ inches high.
- Constructed of heavy-duty 18 gauge welded steel and supported by reinforced corners and double folded edges.
- Built with weight-bearing C-shaped dividers to prevent the shelves from sagging under heavy-load demands.
- Installed easily with stackable, modular units that interlock to form customized configurations.
- Available in many sizes to suit your space requirements.
- Closed in the back and on the sides to help prevent lost folders.
- Space efficient because the full width is available for folders.

## Stackable Shelving Cabinetry for the ColorFile® Filing System

### Filing that Fits Your Needs

Pair your Stackable Shelving Cabinetry with one of our mobile systems or add Roll-Top Doors to help keep customer and business information safe by enabling you to lock your open-faced filing cabinets when not in use. Pick the features that work best for your dealership:

- Square shelves hold more files per square foot and help maximize your filing space.
- Fifty-five degree slanted shelves make the color-coded folder tabs easily visible and accessible by shingling each folder's edge past the previous one.
- Optional sliding work shelves provide a sturdy work surface and can be easily added onto your Stackable Shelving cabinet.
- Standard-Fit Roll-Top Doors attach to each existing filing cabinet and offer an easy-to-use keyed locking mechanism.
- Custom-Fit Roll-Top Doors can be used to cover multiple cabinets up to 11 feet in width. They also have a keyed locking mechanism or can be motorized for easy opening and closing with an electric key switch, remote control, or wireless keypad.

- Combine Stackable Shelving Cabinetry with our Track and Carriage System or Deluxe Mobile System for mobility and ultimate space savings.

Develop a filing strategy to maximize floor space while optimizing dealership productivity and efficiency throughout the filing process with ColorFile Stackable Shelving Cabinetry. The unique modular design allows you to expand your ColorFile Filing System as little or as much as your business needs demand. And if you relocate, all folders can be secured in the tiers for moving, which saves the time and cost of unloading and reloading and prevents the potential loss of records.
