Parts Invoicing for POWER

Simplify the invoicing process with integrated software that enables you to obtain part information, generate parts invoices and price quotes, and post accounting details.

Smart Selling

Increase employee efficiency with an automated parts sales process that uses the fewest keystrokes of any system available. One-click access to the most commonly used parts tasks, reports, and inquiries provides a streamlined sales process to maximize employee productivity and accuracy while also increasing efficiency in your parts department. Plus, integration with your other POWER applications makes it easy to find information and complete tasks quickly. The Parts Invoicing application includes all the features you'd expect from a parts invoicing system, plus:

- Tracks deposits for retail, wholesale, and internal special orders to provide better customer service.
- Integrates with electronic parts catalogs for easy access to parts information and invoicing.
- Integrates closed invoices with accounting

Parts Entry Screen

and provides drill-down directly from invoice records to review and audit how the sale was posted.

- Integrates with optional POWER Instant Manifest and Parts Delivery software.

House Rules

Make the most of your parts invoicing process by customizing pricing and the way information is displayed. Parts Invoicing will work based on your needs to provide more consistent, accurate quotes:

- Offers four-dimensional matrix pricing by Customer, Vendor, Part Type, and Cost. Includes multiple calculations to select highest or lowest possible price for each part, helping achieve a profit on each part sold.
- Is easy to use because of the intuitive graphical user interface.
- Gives counter personnel better information, specific to their needs, through user-defined displays (columns and sequences).
- Allows point-of-sale screens to be customized separately for the front and back parts counters to meet different retail, wholesale, and internal selling needs.

In the Know

Get a better grasp on your parts department through security features and up-to-date reports and records in Parts Invoicing:

- Performance reports give you the big picture.
- Online transaction log shows you details.
- Instant access to each counterperson's sales totals is available by selecting the salesperson. Information is updated in real time and displayed in columnar or graphical formats to make it easy to see sales trends.
- Transaction history is displayed, including the date, time, and employee responsible for creating an invoice, as well as any changes or updates to the invoice.
- Unauthorized discounts are reduced by flagging overrides, which can be displayed on the invoice, a report, or on-screen.
- Extensive security options help you manage each user's access to information and billing functions.

Free your parts employees to increase profit and improve customer satisfaction with quick, accurate invoices through Parts Invoicing for POWER.

Parts Sales by Counterperson
