

Accelerated Delivery Protected Revenue

Parts and Service Solutions for POWER

U.S.

Improve efficiency and increase control over inventory and cash flow by organizing your parts delivery process.

Managed Delivery

Improve the efficiency of your parts delivery process with Parts Delivery System for POWER. Use the specialized parts labeling system to:

- Produce detailed labels for parts that are to be delivered, including part number, list price, customer information, and more.
- Print picking labels individually or in a route-sequenced batch for ordered loading, making routes more efficient and cost-effective.
- Run an invoice report to determine which delivery invoices must be billed.
- View summary reports that list the dollar value and total number of pieces for each route, helping to evenly distribute loads and better manage delivery resources.
- Reduce time and errors associated with data entry through integration with your POWER system.

Indicate delivery terms in the invoice.

Collection Simplicity

Create accurate delivery manifests to better manage revenue:

- Review which parts are to be delivered, what type of payment is involved, and the total amount due at each stop.
- Easily verify that the correct amount is collected with each delivery.
- Record additional information, including exchanges, refusals, and partial refusals.
- Keep track of daily cash flow per route with accounting and collection summaries.

Improved Cash Flow

Improve your parts delivery management and increase your control over cash flow. Protect your gross profit and increase the operational efficiency of your parts delivery process with Parts Delivery System for POWER.
