Vehicle Inventory for POWER

Easily manage your inventory, control vehicle information, and keep your records up-to-date and accurate.

Active & Intelligent

Make inventory management simple with a single vehicle record integrated throughout your POWER system, including key areas like Accounting, Customer Relationship Management, F&I, and your Web site. Vehicle Inventory validates and decodes VIN numbers and even pulls manufacturer options, packages, and color codes to instantly give you the detailed vehicle descriptions you and your customers are looking for. Optional OEM integration reduces the time and errors associated with vehicle orders by automatically adding information into POWER.

Vehicle Lookup

Analyze to Maximize

Staying on top of your entire stock can be difficult and frustrating. Use Vehicle Inventory to create customizable reports to analyze your inventory. Compute interest and insurance charges for every floor-planned vehicle in stock, allowing you to compare actual charges and avoid overpaying. Maximize your inventory management with new and used vehicle analysis.

Better Control of Costs

With Vehicle Inventory's automatic window into the accounting schedule, your managers will always know the correct amount invested in each unit. ROs and POs will automatically update both the vehicle record and the accounting cost and then reconfirm the cost in POWER's F&I software when starting, closing, or posting deals. Stop wasting time and money making sure your information is up-to-date. Focus on what's important with Vehicle Inventory for POWER.
